Northeastern University

Course: DA5020

Assignment: Relational Database Creation & Loading

Total Points: 100

Date Due: Posted on Blackboard

Learning Objectives

In this assignment, you will learn how to:
- create a SQLite database
- connect to SQLite
- create tables using SQL
- add data to tables via SQL INSERT statement or CSV loads

Tasks

Revisit the Bird Strike database developed in the last assignment and review the schema. After installing SQLite, implement the tables for your database design in SQLite and load the data from the Bird Strikes Excel file into the correct tables using either SQL INSERT statements or CSV loads.

Retrieve some rows from the database using SQL SELECT statements to show that the data is loaded properly into the database

Complete the tasks and submit the R script to blackboard.
